DETAILED ACTION

REJECTIONS WITHDRAWN

1. All of the prior rejections of record have been withdrawn.

ALLOWABLE SUBJECT MATTER WITHDRAWN

2. All claims and subject matter previously indicated as allowable have been withdrawn.

Response to Arguments

3. Applicant's arguments with respect to claims 1-3 and 5-6 have been considered but are moot in view of the new ground(s) of rejection.

NEW REJECTIONS

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-3 and 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fenwick (US 1959782) in view of Bourdelais et al. (US 5874205).

Fenwick discloses a waterproof bag comprising a woven base component, at least one waterproof film adhered to an entire inner surface of the base component

Art Unit: 1772

(page 1, column 2, lines 86-104), wherein the waterproof bag has a cylindrical configuration (Fig. 4) (applies to instant claims 1, 3 and 6).

The difference between the instant claims and Fenwick is that Fenwick fails to disclose a photo film adhered to an outer surface of the base component and wherein the base component is weaved with synthetic resin yarns.

Bourdelaïs teaches a composite comprising a polymer sheet affixed to a support layer (abstract). The polymer sheet may be an oriented polyolefin sheet (column 3, lines 49-59). The support layer is a woven polymer layer (column 9, lines 9-14) with a layer of photographic material (column 9, lines 59-63) on its outer side (column 10, lines 17-19 and column 13, lines 21-23) for the purpose of providing advertising or decorative indicia which more aesthetically pleasing to the consumer (applies to instant claims 1-2 and 6).

The references are analogous since both are drawn to plastic/fabric composites.

Therefore it would have been obvious to one of ordinary skill in the art at the time applicant's invention was made to have provided a photo film adhered to an outer surface of the base component and wherein the base component is weaved with synthetic resin yarns in the bag of Fenwick in order to provide advertising or decorative indicia which more aesthetically pleasing to the consumer as taught or suggested by Bourdelaïs.

While neither reference specifically discloses wherein the photo film is adhered only on certain portions of an entire outer surface of the base component, such a limitation is clearly obvious since production costs (less adhesive or welding) and

production time (less adhesive or welding) are lowered. One of ordinary skill in the art is always motivated to reduce production time and/or costs where possible (applies to instant claims 5-6).
